

BrightLink[®] 475Wi, 480i and 485Wi ULTRA-SHORT-THROW INTERACTIVE PROJECTORS

BrightLink 485Wi shown

Interactivity 3.0 — a new level of freedom.

Make almost any wall — or even tabletop — interactive with the sleek and powerful BrightLink 475Wi, 480i and 485Wi projectors. These high-performance, network-ready projectors and interactive pens integrate interactive functionality into one machine without the constraints or expense of an interactive whiteboard. Annotate from any source¹ — directly on projected images sent over the network or on content from DVD/Blu-ray[®] players and document cameras — without the use of a computer. Plus, with dual pen support, two users can write simultaneously, making it easier than ever to actively engage your students in the curriculum. And, setup is easy with auto calibration and no PC driver to install.² Add versatile wall or table mounting options, HDMI connectivity, a built-in 16 W speaker and convenient microphone jack, and these fully loaded BrightLink projectors open the world to interactivity 3.0.

Built-in interactivity — powerful projector + pen combination provides a complete interactive solution without the need for expensive electronic whiteboards

Dual pen support — allows two users to annotate simultaneously, anywhere on the surface on which the image is projected

Instantly annotate — with annotation built into the projector write on projected images from an iPad[®]/iPod,[®] document camera, Blu-ray player; any source you can connect directly to the projectors port plus write directly on ordinary white boards, without ever connecting to a computer³

Ultra flexible interactivity — WXGA images from 60" up to 100" D (475Wi/485Wi); XGA images from 56" up to 93" D (480i)

The best-selling projectors in the world

Epson understands education and has a solution no matter what your teaching scenario. Built with image quality and reliability in mind, EPSON® projectors enhance communication and inspire collaboration, while offering a low cost of ownership. From long-throw projectors designed for traditional educational settings to ultra-short-throw and all-in-one solutions built for progressive classrooms, Epson has the model made for you.

Interactivity built for two — dual pens

Now two users can work simultaneously, or independently, with dual pen support and Epson's Easy Interactive Tools (EIT2) Software. Students can work together seamlessly to share ideas and information.

Instantly annotate — switch sources and keep writing

Increase the value and utilization of your multimedia devices. Use built-in annotation tools, or connect via a wired or wireless⁴ LAN to unlock powerful new features. Annotate over the network, from an iPad/iPhone/iPod touch,³ DVD/Blu-ray player or document camera. You can even annotate without any device at all; use the built-in tools PC-free. Teachers are free to connect existing resources already in their environment, while inviting students up to engage directly with the content.

iWall or iTable — you decide

Expand the possibilities with one projector. With the flexibility of BrightLink, you have the choice to mount your projector on a wall or table, instantly transforming walls or tabletops⁵ into interactive learning surfaces. Educators can use BrightLink in small-group learning centers or as student workstations.

iPad/iPod wireless projection⁴

Use wireless network projection to view files, photos and more from your iPad and iPod devices. Use BrightLink's PC-free annotation tool to highlight, draw and make notes on the displayed content.

EPSON iProjection™ App

Display and control content from your iPhone®, iPad or iPod touch with the EPSON iProjection App and any nearby wireless or networked EPSON® projector.³ This free application allows road warriors to travel light and present from their mobile devices. For teachers, it makes it easy to walk around the class and still be able to share engaging content — larger-than-life. The app is easy to use and navigate with intuitive menu options that make it simple to bring your iOS content to the big screen.

Find out how to set up your EPSON iProjection App and learn more about your projector and device compatibility. To get started, visit epson.com/projectorapp

Ultra flexible interactivity with versatility

While interactive whiteboards are limited to a predetermined height and width, BrightLink has no such constraints. Set the size of the interactive area to fit your available space (475Wi/485Wi, WXGA, from 60" – 100" D, 480i, XGA, 56" – 93" D). Use one type of hardware to fit in various types of spaces, and reduce the complexity and cost of managing and maintaining multiple types of equipment.

90% more active area than a typical 77" board (4:3 aspect ratio),
69% more than a typical 87" board (16:10 aspect ratio)

Ultra-short throw distance

BrightLink's ultra-short-throw projector design eliminates many of the common problems of interactive systems, such as shadowing and eye glare. With an incredibly efficient 0.27" throw ratio, BrightLink 475Wi and 485Wi allow you to project extra-large interactive images up to 100" with the projector less than 10" away from the image surface. This greatly reduces shadows that often appear when using a traditional projector.

Long throw

Ultra short throw

Significant reduction in shadow interference

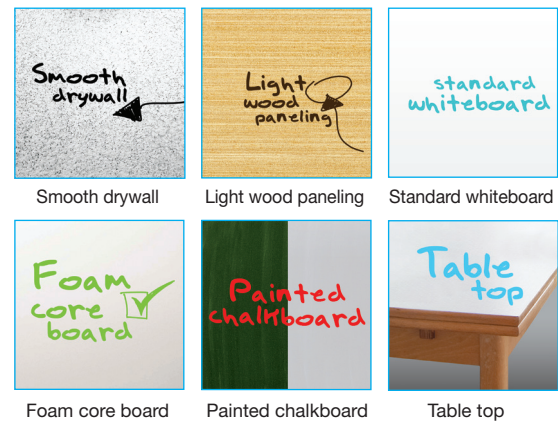

Amazing color and white light output

These BrightLink projectors feature 3100 lumens (BrightLink 485Wi), 3000 lumens (BrightLink 480i) or 2600 lumens (BrightLink 475Wi) of color and white light output⁶ for bright, vibrant, colorful images. And, unlike DLP interactive projectors that decrease in brightness when interactivity is in use, BrightLink consistently shines bright. For interactive lesson plans, presentations and video, rich color and detail are critical — that's why it's more important than ever to understand that Color Light Output is an essential ingredient in achieving optimum performance.

Ultra versatile

BrightLink works on almost any surface — an existing whiteboard, a flat wall, a chalkboard with dry-erase paint or a table.⁵ Interactive capabilities are built into the projector and not into a board; almost any surface will work. Teachers were thrilled to learn they can keep using their dry-erase boards with the BrightLink projector. Save money by not having to hassle with uninstalling perfectly good boards.

3LCD technology — for quality and color that's beyond amazing

Innovative technology with proven reliability

- 3 chips for full-time, vibrant color
- 25% less electricity required per lumen of brightness when compared to 1-chip DLP projectors⁷
- Over 20 years of road-tested reliability built into every projector

Long-life lamp that's easy and affordable to replace

This high-efficiency lamp lasts up to 3000 hours in Normal Mode and up to 4000 hours in ECO Mode, at a replacement cost that is incredibly affordable.⁸ It can be replaced quickly and easily, without having to uninstall the projector from the ceiling.

Easy and intuitive annotation software

Epson's Easy Interactive Tools (EIT2) is an intuitive and easy-to-learn annotation software program designed to get users up and running in minutes. Included free with the BrightLink 475Wi, 480i and 485Wi, Easy Interactive Tools is both Windows® and Mac® compatible and can be installed on as many computers as needed. Available in 34 different languages, EIT2 enables users to save annotations as pdf, jpg, bmp or png files. It also features an on-screen keyboard, magnifying glass, spotlight and shade tool, as well as document camera mode for instantly importing live images into interactive lesson plans.

TeamBoard Draw!

This feature-rich annotation software is a great way to make interactive activities more engaging. Some of the things you can do with TeamBoard Draw!:

- Export your file as a .jpg, .pdf, .tif, .png, .ppt or .iwb
- Create digital notes that can be saved and edited
- Record a session
- Add, delete and move pages
- Place and move text and objects
- Use advanced shape and line tools

TeamBoard Draw! is available for Windows and Mac and ships in the box with BrightLink. Installation is optional and is not required for interactive functionality if another annotation software program is preferred.

RM Easiteach™ Next Generation

Optional RM Easiteach Next Generation is a comprehensive teaching application that enables users to create and deliver engaging lessons and resources in both Windows and Macintosh® environments. Designed for use in K-12 classroom settings, Easiteach offers math, language arts, science and geography toolbars to create exciting, interactive classroom lessons.

HDMI for high-definition video and audio

- Delivers both audio and brilliant HD video content with just one cable
- Compatible with the latest laptops, Blu-ray and media players

Training resources — simple steps for interactive success

Build confidence with a more comfortable learning curve. Learn a little something today, and try it tomorrow.

Step 1 – Welcome kit

Step 2 – How-to videos

Step 3 – Free weekly webinars (live and archived)

Step 4 – Find new, cool tools

Step 5 – On-site professional development

Built-in 16 W speaker and microphone input

- Engage your audience with 16 watts of sound — while eliminating the need for the purchase of external speakers
- Works with wired or wireless dynamic or condenser microphones
- Adjust the volume using the projector remote control
- Audio pass thru if external speakers are wanted

Better Products for a Better Future™

For more information on Epson's environmental programs, go to eco.epson.com

Eco Features

- Energy-efficient 3LCD light engine⁷
- RoHS compliant
- Recyclable product⁹
- Epson America, Inc. is a SmartWaySM Transport Partner¹⁰

Fast, easy setup and control

- Instant Off[®] — no cool-down time required, so it's ready to shut down when you are
- A/V Mute — control your presentation; it's right at your fingertips
- Sleep Mode — set from 1 to 30 minutes to save energy when the projector is in A/V Mute or no signal is detected
- Direct Power On/Off — power the projector on and off with the flip of a wall switch
- Quick source search

Quick Corner[®]

This innovative feature allows you to move any of the four corners of an image independently at setup, using the remote control to adjust each corner for a perfectly rectangular picture

Advanced network connectivity and management capabilities

Unlock the full potential of network-ready BrightLink projectors by attaching to your LAN via a wired or wireless⁴ connection. Network-connected BrightLink projectors not only allow users to present visual and audio content over the LAN, but also to annotate on network content using BrightLink's instant annotation tools. With EPSON[®] EasyMP[®] Monitor software, IT administrators can configure and monitor the status of their EPSON networked projectors, including the remote viewing of power status, lamp hours and temperature/filter conditions.

Crestron[®] RoomView[®] compatible

BrightLink is also compatible with Crestron RoomView, allowing IT managers (those who have standardized their equipment using this popular platform) to easily monitor and control network-connected BrightLink projectors via the same software they use currently to monitor all other projectors on their network.

- 1 Any source that is directly connected to your projector and appears as a source to be accessed by the projector's remote control.
- 2 Driver required for Macintosh.
- 3 Functionality may vary depending on hardware, application, and/or provider restrictions or limitations. Devices and cables not included.
- 4 Requires optional 802.11 network adapter.
- 5 Interactive Table Mode cannot operate without a table mount specifically designed for this purpose.
- 6 Color and white light output will vary depending on mode selected. White light output measured using ISO 21118 standard.
- 7 Data source: ProjectorCentral.com, Jan. 2012. Average of 1122 shipping models for which the manufacturers provided lumens and total power data, all resolutions and brightness levels. Energy efficiency was measured as wattage per lumen. It was measured for both 3LCD and 1-chip projectors in each of five brightness segments. 3 LCD projectors averaged less required electricity per lumen in each of the five segments.
- 8 Lamp life will vary depending upon mode selected, environmental conditions and usage. Lamp brightness decreases over time.
- 9 See our website for convenient and reasonable recycling options at www.epson.com/recycle
- 10 SmartWay is an innovative partnership of the U.S. Environmental Protection Agency that reduces greenhouse gases and other air pollutants and improves fuel efficiency.

BrightLink comes with everything you need from installation to instruction for one low price:

- 3LCD, 3-chip technology for rich, vibrant color and reliable performance
- Your choice of wall or table mount included
- Built-in 16 W speaker, microphone input, and audio pass thru
- Two pens plus rechargeable batteries and battery charger
- Magnetic tray to store both BrightLink pens (includes screws for easy installation)
- USB, VGA and power cables
- Long-life lamp — up to 4000-hour lamp life⁸
- HDMI with HDCP support
- RJ-45 LAN (with included software) and RS-232 connectivity
- Convenient network accessibility — display content over the IP network from any networked location
- Message broadcasting — broadcast announcements or emergency instructions over the network
- Epson's advanced networking and monitoring software — EPSON EasyMP Monitor and EPSON Network Projection software
- Closed-captioning decoder; additional inputs available to add additional speakers
- USB Plug 'n Play instant setup
- Physical locking capabilities and software/network security settings for added protection in any environment
- Full edition TeamBoard Draw! annotation software for Windows and Mac
- Installers kit
- BrightLink Welcome Kit — end-user guide and DVD, including tutorials; free and easily available
- Optional curriculum software available — RM Easiteach Next Generation
- Service and support you can rely on
